

## Queue Crew Overview

|                              |  |
|------------------------------|--|
| <b>Volunteer Role</b>        | Queuing (Queue Crew)   |
| <b>Responsibility</b>        | Line up (queue) teams for each match from the queue tables to the game field in order to help keep matches on schedule. Ensure robots are in order according to the Match List report and aligned with the correct game field.   |
| <b>Report To</b>             | Sign in at Volunteer Check-in; then report to the Head Referee.  |
| <b>Training Before Event</b> | Review all Queuing Resources online, which may include Guide documents (like this one), examples or training videos. <a href="#">On the Volunteer Resources page</a> select the <b>VEX IQ Challenge</b> tab and click on <b>Queuing</b> to reveal training resources available for this role.  |
| <b>Training at Event</b>     | Practice queuing.  |
| <b>Dress Code</b>            | Wear comfortable clothes that are appropriate for a school related event, closed toe shoes, and volunteer t-shirt (if provided).   |
| <b>Location/Position</b>     | Report to your assigned field area 30 minutes before practice and qualification matches begin. Queue Crew is located at the queueing tables near the game fields.  |
| <b>Supplies</b>              | Clipboard, pen or pencil, highlighter, Match List report.  |
| <b>Queue Crew Process</b>    | Be ready to queue teams as soon as the Match List is distributed. As each match is completed and scored, the referee will signal for the field to be reset and the next teams to advance to the field. For the current match, robots should be on the correct field. For the next match, "on-deck" robots should be on the queue table. For future matches, robots should wait their turn to advance to the "on deck" queue table.<br><i>It is the responsibility of each team to be on time for matches. Follow up with missing "on deck" teams by sending their alliance partner to locate them. If both teams are missing, Queue Crew may go to the Pit Area to locate teams as a courtesy.</i> |
