

Where to Download Robot Programming Software

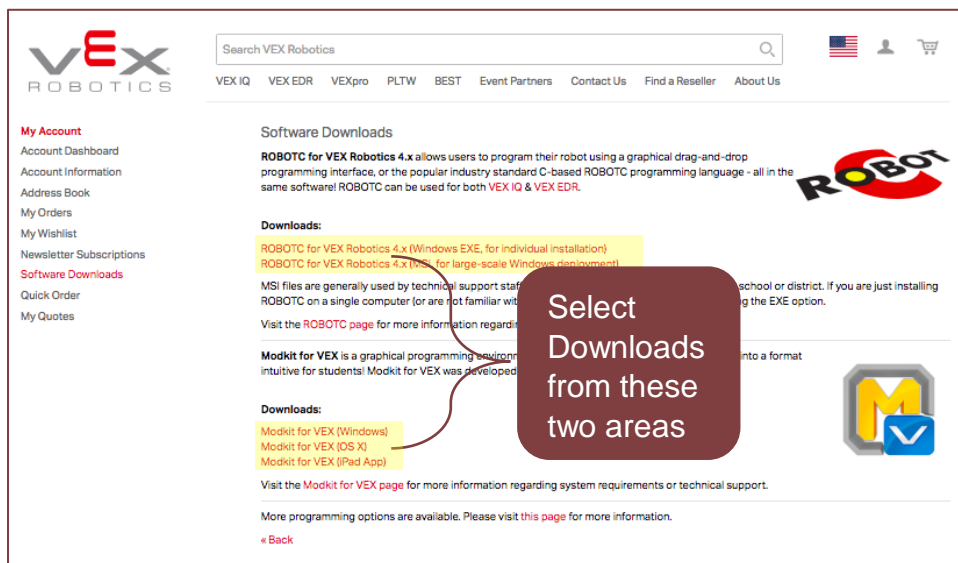

Overview

ROBOTC may be used to program either the EDR Cortex of VEX IQ controllers. ModKit may be used to program the VEX IQ controller. Here is how to download the software.

Log into VEXrobotics.com and go to your dashboard. If you do not have a VEXrobotics.com account you will need to create one before downloading the free software. The ROBOTC download is located on the “My Account” menu on the left side of the screen. Click on **“Software Downloads.”**

Next select the download you want by clicking appropriate the link.

Additional resources for using Robot C may be found on the robotc.net website.

V5 uses the new VEX coding Studio. Here are some important links for VEX Coding Studio.

- VEX Coding Studio Download site. Select your operating system and download the VEX Coding Studio software:
<https://www.vexrobotics.com/vexedr/products/programming>
- VEX Coding Studio API Command Reference links:
