GET INSPIRED

2020
APRIL 22-28

VOLUNTEER
AT VEX WORLDS CHAMPIONSHIP
for the 13th annual competition at the Kentucky Exposition Center, Louisville, KY

Be part of something BIG, give back to your community and show your support for the brightest student minds in the World as they come together for a massive competition celebrating STEM education, collaboration, hard work, and year-round dedication.

Volunteers are a vital part of making this exciting experience possible for students. By participating as a volunteer you’ll show your passion for the importance of STEM education, and inspire our future.

Sincerely,
Taunja Weber, CVA
Community Engagement Coordinator

OUR VISION
We see a future where all students design and innovate as part of a team, experience failure, preserve, and embrace STEM. These lifelong learners emerge confident in their ability to make the world a better place.

VOLUNTEER ROLES

JUDGE
Anyone can be a Judge, and no engineering experience is necessary. You will simply be assigned to judge a non-technical aspect of the competition if you are not familiar with robotics. This role is interactive and inspirational, as Judges get to talk with teams and view their work.

INSPECTOR
This role is enjoyed by detail-oriented people. Inspectors follow a checklist to make sure that the competition robots are compliant with all the rules (adults only, and training is quick and easy).

SCOREKEEPER REFEREE
This role is simple. You use a computer to start and stop a timer. That’s it! Easy to learn.

FIELD RESET
If you want to bring your kids, you can all volunteer together, provided that spots are still available. Even younger kids enjoy Field Reset. They set up the scoring objects on the field after the team finishes their match, using a simple diagram as reference.

QUEUING
This is an easy role that gets you near the action where the student teams are competing. The Queue Crew uses a team list to make sure all teams are guided to the correct competition field. This is a great family role, as parents can Queue while kids do Field Reset in the same area.

GROUP VOLUNTEER
Would you and your peers/co-workers like to be a part of the largest robotics event in the world? Group volunteers are not only welcome but a necessity to make this event a success. Join our volunteer team, get inspired, and have fun! If your company or organization is looking for a great way to make a difference and create a team-building experience that is mutually beneficial.

Our Group volunteers get first choice of shirts. Individuals and public registration will not begin until April 4th. Deadline for group first choice will be Friday, April 3rd. For more information, contact volunteer@roboticseducation.org.

MAKE YOUR MARK
Get inspired by the brightest student minds as they come together to celebrate STEM education, collaboration, hard work, and dedication. Many volunteer roles do not require previous experience, and we provide online training resources to prepare you for most positions. We are in greatest need of volunteers who can help all day or multiple days, but a wide variety of shifts are available to fit your schedule.

“In 2019, a study showed community volunteers allowed us to put over $22,000 back into the Foundation, providing more program support and workshops development for educators.”
