

Team Number: \_\_\_\_\_ Division: \_\_\_\_\_

The purpose of the Field & Technology Inspection Checklist is to ensure the team is prepared for participation in a Live Remote Tournament. Inspection confirms all elements of the team’s field (field elements, game pieces and robot) are set up in the correct starting positions and the field is viewable throughout the matches. If a team does not pass a field inspection item, the Head Referee or EP can work with the team prior to the event to assist with compliance. Teams that do not pass inspection will not be able to compete. *Ultimately, it is the team’s responsibility to meet these criteria prior to each match in a timely manner. They must demonstrate their compliance during their assigned inspection time.*

Inspection Item	Rule #
<input type="checkbox"/> Computer, camera, and playing field which are designated for use by LRT system are dedicated solely for the purpose of the LRT system by <b>a single team</b> for the duration of the event <input type="checkbox"/> Teams must confirm they will not be running any additional audio or video software or service for the duration of the event	<b>System Requirement</b>
<input type="checkbox"/> Team Primary or secondary contact is able to log into Remote.RobotEvents.com via Google Chrome web browser with “Experimental Web Platform Features” enabled <input type="checkbox"/> Team has a microUSB cable of sufficient length to connect their controller to their computer	<b>System Requirement</b>
<input type="checkbox"/> Team is using an external USB webcam of 720p or higher resolution <input type="checkbox"/> Camera view shows Driver(s), Robot, Controller(s), and the entire field, including the entire field perimeter and game/field elements under sufficient and consistent lighting	<b>System Requirement</b>
<b>➔ Webcam is (See Figure below):</b> <input type="checkbox"/> Secured (not handheld) <input type="checkbox"/> At an elevated height (~7’ above height of field) <input type="checkbox"/> Facing the field from the audience side (red alliance on the left) <input type="checkbox"/> At the center of the field with an unobstructed view of the scoring goals and Drive Teams	<b>System Requirement</b>
<b>➔ Team demonstrates (See Figure below):</b> <input type="checkbox"/> Knowledge of legal Robot Starting Positions for both Red and Blue alliances <input type="checkbox"/> Proper field setup with 14 Balls of each color plus one (1) Preload Ball touching the robot	<b>&lt;SG1&gt;</b>
<input type="checkbox"/> Team Facilitator is present for all matches and their event day phone number is available to the EP. (Team Facilitator Policy and Requirements in LRT Team Instructions) <input type="checkbox"/> Team Facilitator verbally confirms they have read the LRT Team Instructions document	<b>System Requirement</b>

*\* Team completes field and technology inspection when all check boxes are complete.*

### Final Inspection *(Circle when passed)*

### Pass

- Team verbally agrees to maintain the field & technology inspection requirements for the duration of the Live Remote Tournament.
