The purpose of the Field Inspection Checklist is to ensure the team is prepared for participating in a Remote Skills Tournament. Inspection confirms all elements of the team's field (field elements, game pieces and robot) are set up in the correct starting positions and the field is viewable throughout the matches. If a team does not pass a field inspection item, the Head Referee or EP can work with the team prior or during the event to assist with compliance. *Ultimately, it is the team's responsibility to meet the criteria prior to each match in a timely manner.*
