Dear VEX Robotics Competition Team Members:

Welcome and congratulations on making it to the world championship competition!

The Northrop Grumman Foundation is honored to partner with the Robotics Education & Competition Foundation to make VEX Robotics education programming available to students, like you, from all around the world.

Through your involvement in VEX Robotics, you have increased your technical expertise, gained important life skills, and had fun at the same time. I hope this experience will further inspire your interest in science, technology, engineering and math (STEM) areas of study and possible career paths.

Now that you have made it to the VEX Robotics World Championship, I hope you will take a moment to appreciate the time and dedication it took to get here, the lessons you have learned along the way, and the teammates you have come to rely on. All of these factors played a critical part in preparing you to compete against the best teams in the world.

On behalf of all of us at Northrop Grumman and the Northrop Grumman Foundation, we wish you the best of luck at the VEX Robotics World Championship. Continue to impact the world through STEM!

Best Wishes,

Sandra Evers-Manly
